SUMMARY

A professional front-end developer with over 10 years of design and development experience with HTML and CSS. Other skills include responsive web design, wireframing and producing mockups within an agile environment (Certified ScrumMaster '12). I have a Bachelor's degree in Graphic Design and am very comfortable troubleshooting within JavaScript, Java, PHP and .NET. I have also learned a lot about user experience from some amazing UX Architects and am interested in pursuing a UI Designer/Front-End Developer position.

EXPERIENCE

Citrix Systems, Senior Web Developer   09/2010 - 02/2015
- Developed cross-browser compatible, standards-compliant and responsive web pages using HTML5, CSS3, JavaScript and template scripting, according to software requirements and design specifications
- Created the User Interface and Visual Designs for applications while focusing on user needs and optimal user experience
- Worked closely with UX Designers and regularly attended UX Meetups in order to expand my knowledge of human-centered design
- Debugged, maintained and updated applications within the Google Web Toolkit framework as well as Java-based templates such as Freemarker
- Worked as the dedicated Front-end Developer for Citrix Project Accelerator, Citrix Project Serenity Beta and Paper Cloud WordPress site
- Volunteered to help migrate A Kids' Brain Tumor Cure PLGA Foundation's site to WordPress
- Kept current with technical trends and incorporated them within assignments as appropriate
- Recommended improvements and changes in designs and gave professional appraisal on implementation of the design as planned and/or executed
- Analyzed requirements, and contributed to software requirements and design specifications for projects of significant scope

BGT Partners, UI Developer   01/2010 - 09/2010
- Developed cross-browser compatible and standards-compliant HTML/XHTML Pages based on Visual Designs provided by the Graphic Design team
- Created reusable templates within PHP framework
- Debugged and fixed layout issues within development team's .NET and JavaScript framework
- Documented and maintained coding, commenting and validation

Automated Healthcare Solutions, Multimedia Specialist   01/2009 – 10/2009
- Captured and edited videos with Final Cut Pro

- Created Interactive DVDs with DVD Studio Pro
- Created patent drawings
- Created the User Interface and Visual Designs for web based applications
- Developed and designed cross-browser pages within a .NET environment
- Documented and maintained coding, commenting, validation and testing standards

Kaplan University, HTML Developer/Designer   12/2007 - 01/2009
- Created Visual Designs for web pages based on UI Team prototypes
- Developed and designed cross-browser pages for a .NET environment
- Debugged and fixed layout issues within development team's ASP and JavaScript framework
- Documented and maintained coding, commenting, validation and testing standards
- Developed HTML Style Guides based on finalized templates
